One of things with this Yahoo group is the impossibility of seeing files without being a member. There are a lot of people who wish to browse for information but don't want to register to do so. Soit's time to have our own site/server to do this.

Since I was on the road a lot between June 30 and now, it was hard to do without internet access.

The first step was the domain - so I got 3abntalk.org/com/net registered with, where else, bluehost.

The next step is making it into the kind of site where files can be posted by members and downloaded by anybody.

The next step is making you guys the forum administrators/moderators.

I'll work on all that and more this week.

This is not going to replace/supersede anything done here. The first step was just making those files downloadable - i.e., have a link here that points there. The next step is having your answers to the posts in other sites (adventtalk etc) pointed to 3abntalk - let them go to 3abntalk if they want to read their replies.

They have an adventtalk, we have our 3abntalk.
